Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Donovan et al. (US 2004/0168555).

Donovan discloses all the recited elements of the invention including:

- a) a base (102) provided with a motor (112);
- b) a driving wheel (110);
- c) a movable device (106) movably provided on a top of base to be moved between a distal position and a proximal position;
- d) a driven wheel (108) pivoted on the movable device;
- e) a band saw (114);
- f) a shaft (208) of a fine adjusting device formed as a unit having a section engaged with the movable device and having a contacting portion (at 209) at bottom end thereof;

Art Unit: 3724

g) a transmission device (210) formed as a unit movably disposed on the base and having a top end abutting the bottom end of the contacting portion

h) a cam device (222);

i) a handle (260).

Regarding claim 2, a U-shaped portion having an upward opening and two parallel straight portions (104).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Donovan et al.

Donovan discloses the invention substantially as claimed including a connection tube (117). Donovan fails to disclose the connection tube being round. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the connection tube to be round since such a modification would not have destroyed the characteristics (function) of the basic reference. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. In re Dailey et al., 149 USPQ 47.

Art Unit: 3724

5. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donovan et al. in view of Snodgrass, Jr. (US 6,739,231).

Regarding claim 4, the modified device of Donovan discloses the invention substantially as claimed except for a chamber having thread holes at top and bottom. Snodgrass teaches the use of a chamber having thread holes at top and bottom to provide a common thread arrangement with a tensioning shaft as old and well known in the art for the purpose of adjusting tension. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the movable device on the modified device of Donovan with a chamber having thread holes at top and bottom as taught by Snodgrass in order to facilitate movement of the fine adjusting device. Regarding claim 5, the modified device of Donovan fails to disclose a cone recess and a cone. However, one having ordinary skill in the art would have been motivated to provide a cone recess and a cone as an alternative arrangement for operatively connecting two elements. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. In re Dailey et al., 149 USPQ 47. It is noted that the common knowledge or well-known in the art statement regarding the cone recess and the cone recited in claim 5 in the previous office action is taken to be admitted prior art since applicant failed to traverse the examiner's assertion. Regarding claim 6, see Figures 1B- 2 of Donovan, a thread section (at 208), a nut (206), and a spring (203).

***Response to Arguments***

6. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Friday 9:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
